

MATHS HUBS PROJECTS 2020/21

EARLY YEARS MATHS

Which Maths Hubs professional development opportunity suits you and your school this year?

Are you an experienced Early Years practitioner, or new to the profession?
Do you want to consolidate your maths subject knowledge and pedagogy?
Or do you want to embed excellent practice into your maths teaching, and support colleagues to do the same?

The Maths Hubs Programme for 2020/21 has something for everyone. Collaborative, locally-based Work Groups support those who want to work with others to develop their own practice and knowledge and benefit their school. National leadership programmes also provide a chance to gain recognised qualifications and develop the skills of others.

All Maths Hubs opportunities are free to join and funding is often available to offset the cost of cover. Participants are encouraged and enabled to share good practice with colleagues in their schools.

Want an improvement in whole school maths teaching?

Building Firm Mathematical Foundations in Reception is aimed at schools who are currently developing a teaching for mastery approach in KS1 and KS2. Early Years practitioners and senior leaders will develop their understanding of how EY best practice feeds into a teaching for mastery approach, and build firm foundations for all children so that they are ready to progress into Year 1.

Want to become a more effective and knowledgeable practitioner?

Practitioners, teachers and teaching assistants who want to develop their subject knowledge and pedagogy in maths teaching can take part in a **Subject Knowledge for Teaching Mathematics (SKTM)** programme. Participants will access newly-developed resources and benefit from expert input. The SKTM programmes offer subject-specific guidance for EY practitioners and TAs working in EYFS.

Want to become a leader of maths-specific professional development?

Experienced Early Years practitioners can become nationally recognised Professional Development Leads. Through the **NCETM PD Lead Development Accreditation Programme**, participants develop, run and evaluate a programme of professional development for colleagues, leading to accreditation as a PD Lead.

HOW TO TAKE PART:

Simply visit www.mathshubs.org.uk and contact your local hub to find out what you can get involved with in 2020/21.

Covid-19 Recovery

The ongoing impact of the coronavirus outbreak and knock-on effects on school life remain uncertain.

So, all Maths Hubs work will adapt to changing realities. There's likely to be more live online collaboration, for example. In addition, Work Group content will address both schools' recovery from coronavirus-related disruption and the central maths subject matter of each project.
