

## Newham Secondary

# Maths Leaders Network 22/23

This Secondary mathematics network will Support HODs and Key Stage 3/4 coordinators to strengthen their team and thereby their pupil outcomes through maths specific leadership conversations on pedagogy, curriculum and change management. It is a community that will support and enhance the work of maths leaders.

What to expect from the meetings

- **Professional dialogue on key leadership issues**
- **Input on developing mathematical pedagogy spanning years 7-11**
- **Updates - keeping abreast of the national picture in mathematics and how it affects departments**

The meetings are to create an atmosphere in which we can learn from and support each other in a role that is extremely influential but can be highly pressured. We do hope that more than 1 person from each maths team can attend.
